Education

Oregon State University, Corvallis, Oregon, USA
Ph.D. in Computer Science (— Expected Fall 2022)
M.Sc in Computer Science (June 2020)
Advised by Dr. Fuxin Li

Research Interests

Explainable AI (XAI), Computer Vision, Feature Disentanglement, Generative Models, Unsupervised Learning, Reinforcement Learning.

Work And Research Experiences

2D/3D Computer Vision for Autonomous Vehicles
Machine Learning Research Engineer Intern at Scale AI, Jan - Apr 2021
Pre-labeling scenes based on Lidar and camera inputs of AVs.

eXplainable Artificial Intelligence (XAI)
Researcher at Oregon State University, Dec 2017 - Now

- **Counterfactual visual explanation**: Generating CF explanations from the latent space of generative models.
- **Understanding recurrent policy networks by Finite-State Machines (FSM)**: Quantizing the representations of memory and observations of RNNs and analyzing them using FSM, known as Moore Machine.
- **Non-negative factorization for feature disentanglement:** Layer-wise feature disentanglement of deep networks by low-rank matrix factorization and a novel training scheme for deep networks using ADMM.
- **Integrated-Gradient optimized attribution (saliency) maps:** Saliency map generation methods that optimize perturbation masks using integrated gradient.
- **Deep feature embedding for automatic high-level concept extraction:** a novel explanation module for extracting concepts from the activation space of the deep networks

Automatic Medical Coding *Data scientist at Carrene, May - Dec 2017*
Research on automatic medical prescription analysis and coding.
